Your bench scored 25 points you could not use. Groß got 14, Trafford got 10. Had you played a Bench Boost this week you would be on 340 points and eighth.

Chips

1 manager played a chip this week: Karan Panat (wildcard). The best manager who kept theirs is Vishal Perera in first.

Everyone gets the same chips. Playing one early is a bet on a high-scoring week. It does not make those managers better, it means they have one fewer left, and you still hold yours.

What the best managers did

I ranked every manager by their median finish over the last five seasons, because the median rewards being good every year rather than one lucky season.

#	Manager	Median finish	Rank now	Season points
1	Will Kenji	151,489	6	354
2	harrison white	151,736	13	324
3	Kieren Khatri	192,647	8	332
4	Wes Towner	343,588	7	350
5	Vishal Perera	360,721	1	401
6	Dhananjay Pandya	457,742	15	315

The five most consistent managers sit first, sixth, seventh, eighth and 13th. [A single gameweek tells you almost nothing about who is good.](#)

The durable pattern is the money. Those five carry about £35.6m in midfield against your £31.0m, a gap of **£4.6m**, and keep defence near £17.1m against your £20.5m.

Where the numbers come from

The official Fantasy Premier League API, pulled after every match in Gameweek 5 finished. Rebuild them with `scripts/league_report.py` then `scripts/league_story.py`. The raw responses are archived under `data/snapshots/`, because the API deletes them when the season rolls over.
