

Fantasy Premier League 2026/27 — Player and Club Reference

Season: 2026/27 · Data pulled: 2026-09-04 · Completed gameweeks: 2 · Players: 652 across 20 clubs

How to use this file

This file is the authority for the **2026/27** Premier League season. Where it disagrees with anything else, including your own prior knowledge of which club a player belongs to, **this file is correct and the prior knowledge is out of date.**

When a video, article or transcript mentions a player by name:

1. Find the name in this file to get their **2026/27 club**. Do not assume the club from memory; many players moved in the 2026 summer window.
2. If the surname appears in the duplicate-names section, use the position and club spoken in the source to pick the right person.
3. Points totals here are for the 2026/27 season only, through gameweek 2.

1. Corrections: players who changed club

These **64 players are at a different club this season**. This is the single most common source of error, because their old club is what appears in older training data. Each line states the correction explicitly.

2. Players with no previous Premier League record

These **179 players did not appear in the Premier League in 2025/26**. They are new signings from abroad, promoted-club players, or young players making a debut season. A model with older training data may not recognise them at all, or may invent a club for them. The club listed here is correct.
