Your points came mostly from Haaland 13, Tarkowski 12, Calafiori 11. Your two most expensive starters, Haaland and Thiago, cost £23.5m together and scored 15 points between them.

Your bench scored 14 points you could not use. Groß got 13, Kinsky got 1. Had you played a Bench Boost this week you would be on 153 points and ninth.

Chips

1 manager played a chip this week: Wayne Mungai (wildcard). The best manager who kept theirs is Vishal Perera in first.

Everyone gets the same chips. Playing one early is a bet on a high-scoring week. It does not make those managers better, it means they have one fewer left, and you still hold yours.

What the best managers did

I ranked every manager by their median finish over the last five seasons, because the median rewards being good every year rather than one lucky season.

#	Manager	Median finish	Rank now	Season points
1	Will Kenji	151,489	4	176
2	harrison white	151,736	8	155
3	Kieren Khatri	192,647	15	132
4	Wes Towner	343,588	6	161
5	Vishal Perera	360,721	1	196
6	Dhananjay Pandya	457,742	10	139

The five most consistent managers sit first, fourth, sixth, eighth and 15th. [A single gameweek tells you almost nothing about who is good.](#)

The durable pattern is the money. Those five carry about £34.2m in midfield against your £24.5m, a gap of **£9.7m**, and keep defence near £15.7m against your £18.0m.

Where the numbers come from

The official Fantasy Premier League API, pulled after every match in Gameweek 2 finished. Rebuild them with `scripts/league_report.py` then `scripts/league_story.py`. The raw responses are archived under `data/snapshots/`, because the API deletes them when the season rolls over.
