What the template did

The template is the group of players most managers own. [6 of the 15 most-owned players scored 2 points or fewer](#), and the average was 3.5.

9 of them beat 2 points.

Your own captain, Haaland, was owned by 86% of the league and captained by 19 of 22 managers. He returned **9 points**, which the armband turned into 18 for you.

Your points came mostly from Vuskovic 12, Haaland 9, Gvardiol 8. Your two most expensive starters, Haaland and Thiago, cost £23.5m together and scored 11 points between them.

Your bench scored 27 points you could not use. Mitchell got 15, Kinsky got 6. Had you played a Bench Boost this week you would be on 230 points and fifth.

Chips

15 managers played a chip this week: Vishal Perera (triple captain), Andy Teelostabet (triple captain), Aparajit Roy (free hit), Will Kenji (triple captain), Patrick Le (triple captain), Karan Panat (free hit), harrison white (triple captain), Kieren Khatri (triple captain), Dhananjay Pandya (triple captain), ashik Kavanakudy (triple captain), Andrew Daniels (triple captain), Blake Greig Canty (free hit), Steven Kunej (triple captain), Harsh Tamta (triple captain), James Moore (wildcard). The best manager who kept theirs is Wes Towner in sixth.

Everyone gets the same chips. Playing one early is a bet on a high-scoring week. It does not make those managers better, it means they have one fewer left, and you still hold yours.

What the best managers did

I ranked every manager by their median finish over the last five seasons, because the median rewards being good every year rather than one lucky season.

#	Manager	Median finish	Rank now	Season points
1	Will Kenji	151,489	4	232
2	harrison white	151,736	8	210
3	Kieren Khatri	192,647	9	208
4	Wes Towner	343,588	6	228
5	Vishal Perera	360,721	1	259
6	Dhananjay Pandya	457,742	10	203

The five most consistent managers sit first, fourth, sixth, eighth and ninth. [A single gameweek tells you almost nothing about who is good.](#)

The durable pattern is the money. Those five carry about £36.3m in midfield against your £25.5m, a gap of **£10.8m**, and keep defence near £17.6m against your £16.0m.

Where the numbers come from

The official Fantasy Premier League API, pulled after every match in Gameweek 3 finished. Rebuild them with `scripts/league_report.py` then `scripts/league_story.py`. The raw responses are archived under `data/snapshots/`, because the API deletes them when the season rolls over.
