Appendix

How Gameweek 1 finished

You finished **5th of 22 on 59 points**. The league averaged 51.5, so you beat it by 7.5. You started the week sixth on 32 points.

At my first look I told you that you could not lose ground to the leader, because every player he had left was also in your team and you captained Haaland while he did not. That held. **The gap closed from 23 points to 11**. That manager has since renamed from “Andy Mcgoonface” to “Andy Tlostabet”, so I tracked them by their team id rather than their name.

I also told you the finishing order was settled. That was half right. You did finish 5th, but I only checked the managers immediately around you. Karan Yohannan still had several Chelsea and Fulham players to come, gained 25 points in the last match, and climbed from fifteenth to join you on 59. The lesson is to check the whole table for players still to play, not just the managers nearest you.

Aparajit Roy won the week with 80 after playing a Bench Boost.

The template blanked

The template is the group of players most managers own. This week it failed almost everyone. **10 of the 15 most-owned players scored 2 points or fewer.** The average was 3.6 points.

Player	Position	Club	Owned by	Counting captains	Points	You own?
João Pedro	FWD	CHE	73%	68%	11	Yes
Calafiori	DEF	ARS	59%	59%	9	Yes
Raya	GKP	ARS	41%	41%	6	Yes
Tzolis	MID	ARS	41%	41%	6	No
Gabriel	DEF	ARS	41%	41%	5	No
Kinsky	GKP	TOT	36%	27%	2	Yes
Diop	DEF	IPS	32%	9%	2	No
B.Fernandes	MID	MUN	64%	86%	2	No
Groß	MID	BHA	50%	32%	2	Yes
Mbeumo	MID	MUN	41%	41%	2	No
Wirtz	MID	LIV	32%	32%	2	No

Player	Position	Club	Owned by	Counting captains	Points	You own?
Haaland	FWD	MCI	77%	141%	2	Yes
Shaw	DEF	MUN	41%	32%	1	No
Maguire	DEF	MUN	32%	27%	1	No
Calvert-Lewin	FWD	LEE	50%	36%	1	No

Notice who did deliver. Every one of the four template players who beat 2 points plays for Arsenal: Calafiori, Raya, Tzolis and Gabriel. Arsenal beat Coventry 3-0. If you did not own Arsenal players this week, you had a bad week.

The clearest example of the blank is your own captain. Haaland was owned by 77% of the league and captained by 14 of 22 managers. He returned [2 points](#). Because you doubled him, he gave you 4.

That sounds bad, and it was. But it hurt your rivals just as much. When a player that popular fails, owning him costs you nothing in the league table. It only costs you against managers who picked someone else, and almost nobody did.

Your own team

Player	Position	Club	Price	Role	Scored	Counted for you
João Pedro	FWD	CHE	£7.5m	Started	11	11
Calafiori	DEF	ARS	£5.5m	Started	9	9
Ndiaye	MID	EVE	£6.0m	Started	9	9
Szoboszlai	MID	LIV	£7.0m	Started	8	8
Raya	GKP	ARS	£6.0m	Started	6	6
Tarkowski	DEF	EVE	£6.0m	Started	6	6
Vuskovic	DEF	BHA	£5.0m	Bench	6	0
Ampadu	MID	LEE	£5.5m	Bench	5	0
Virgil	DEF	LIV	£6.5m	Started	2	2
E.Le Fée	MID	SUN	£6.0m	Started	2	2
Groß	MID	BHA	£5.5m	Started	2	2
Haaland	FWD	MCI	£15.5m	Captain	2	4

Player	Position	Club	Price	Role	Scored	Counted for you
Kinsky	GKP	TOT	£4.5m	Bench	2	0
Mitchell	DEF	CRY	£4.5m	Bench	1	0
Thiago	FWD	BRE	£8.0m	Started	0	0

Your climb came from the middle of your squad, not the top. Calafiori and Ndiaye scored 9 each, and Szoboszlai scored 8. Your two most expensive attackers, Haaland and Igor Thiago, cost £23.5m together and scored 2 points between them, which the armband turned into 4.

Your bench scored 14 points you could not use. Vuskovic got 6 and Ampadu got 5. Had you played your Bench Boost this week, you would be on 73 points and sitting third.

The chip, not the picks, decided the top

Three of the top four managers played their Bench Boost this week. The best manager who did not use a chip is Andy Tlostabet in third.

Be careful how you read this. Everyone gets the same chips. Playing one early is a gamble on a high-scoring week, and this week paid off. It does not make those managers better. It means they have one fewer chip to use later, and you still hold yours.

What the best managers did

I ranked every manager by their median finish over the last five seasons, because the median rewards being good every year rather than one lucky season.

#	Manager	Median finish	Rank this week	Points this week
1	Will Kenji	151,489	4	65
2	harrison white	151,736	20	37
3	Kieren Khatri	192,647	9	54
4	Wes Towner	343,588	15	46
5	Vishal Perera	360,721	2	74
6	Dhananjay Pandya	457,742	5	59

Look at the right-hand columns. The five most consistent managers finished all over the table this week, from second down to twenty-first. **One gameweek tells you almost nothing about who is good.** That is exactly why you should not change your plan based on this week.

The durable pattern is still the money. Those five managers keep defence between £14.5m and £16.5m and put between £30.5m and £42.5m into midfield. You spend £18.0m on defence and £24.5m on midfield. That is a **£9.7m midfield gap** against the managers who win most often, and it has not moved.

What to carry into Gameweek 2

Two numbers matter from here.

First, **your midfield spend against the £34m the best managers carry**. You are £9.7m short, and one bad week for those midfielders does not change the pattern. It is the one structural difference between you and the managers who finish well every year.

Second, **your chips**. You still hold your Bench Boost. Three of the four managers who finished above you have now spent theirs. In a week where your bench scored 14 points, that chip was worth roughly two league places, and you still have it.

Do not chase this week. The template blanked, your captain blanked, and you still finished fifth and above average. That is a reasonable place to start a season.

Where the numbers come from

Everything here comes from the official Fantasy Premier League API, refreshed this morning with nine of ten matches played. Bonus points are not yet final, so small changes are still possible. Rebuild every number by running `scripts/league_report.py` and then `scripts/league_story.py`.
